Fernando Llopis

Senior Mobile Developer · React Native · iOS & Android 

Experience

Senior Frontend Developer

Hiberus

Jun 2022 – Currently

- Web application development with **React (ES6)**, REST API, and **Testing Library**.
- Implementation of Cypress and Stryker to ensure code quality (+80% required). Version control with Git and automated deployments via ChatBot.
- I work under **Scrum (2-week sprints, Jira)**.
- Highly demanding environment (**international client: Inditex**).

Senior Full-Stack & Mobile Developer

Freelance

Abr 2021 – Jun 2022

- Mobile application development with React Native and PHP/MySQL backends.
- **Tour of Spain Cycling Race Project:** Sole design and development of the entire internal infrastructure and a complete back office (hotel management, equipment, budgets, logistics).
- **APP Poligono Suppliers Project:** React Native + API with push notifications and stock validation, optimizing internal processes and drastically reducing the operational load.
- **DoersIndex APP Project:** Social network for workers in React Native + API + PHP/MySQL, for distribution in US stores.

Senior Full-Stack Developer (Laravel & PHP)

Different Roads

Oct 2018 – Mar 2021

- Development of the new corporate website with Laravel.
- Creation of internal management tools and systems in PHP/MySQL to reduce the workload of different departments.
- Integration with Pipefy, Asana, and Zeplin using agile methodologies.
- Version control with GIT.

Full-Stack Developer & Analyst

Anelis Network

May 2013 – Oct 2018

- Development of custom projects in **PHP, MySQL, React Native, Node.js (basic)**.
- Coordinated and led projects with teams of up to 5 people.
- Mobile app development in **React Native** (e.g., WhatsApp-style messaging app for internal communication).

Key projects

- **Poligono suppliers:** React Native app + API, with push notifications for suppliers and stock validation. Automation of the entire order flow, eliminating repetitive manual processes → reduced the customer's daily administrative workload by >90%.
- **DoersIndex:** Social network for workers developed in React Native + PHP/MySQL with secure RESTful API. Published on Google Play and the App Store (US), with internationalization (i18n).
- **Be Budget Today:** Personal finance app with React Native (Expo SDK). Implements advanced navigation using Expo Router, full internationalization (i18n), and secure session management with persistent local storage.
